

Reported Methyl Bromide Consumption in European Union Countries, 1991 - 1999 (MT) (non-QPS uses)

Country	Historical					
	1991	1995	1996	1997	1998	1999
Belgium (and Luxembourg)	3,290	3,848	4,237	5,427	5,263	4,341
France	4,195	3,294	4,567	4,296	2,576	2,461
Italy	6,974	52	0	0	0	3
Netherlands	59	1,371	1,415	8	0	1
Spain	0	2,970	0	0	0	0
Greece	960	0	0	1,100	0	0
United Kingdom	629	0	0	0	0	0
Germany	237	0	0	0	0	0
Portugal	65	14	0	0	0	0
Sweden	27	10	0	34	2	
Denmark	36	9	8	5	0	0
Ireland	40	0	0	0	0	0
Finland	8	8	3	0	0	
Austria	3	0	0	0	0	0
Total	\$16,523	\$11,576	\$10,230	\$10,870	\$7,840	\$6,807
Total EU Reported	19,217	17,595	18,178	16,770	11,759	

Sources: Oberthür 2000, 2001; Ozone Secretariat 2001; UNEP 2000; U.S. Census 2001; ICF 1999.

Note: Blank spaces indicate no reported data, while a zero (0) indicates either no reported data or 0 MT of methyl bromide consumption.

Totals may not sum due to independent rounding.

- All European Union (EU) countries are Non-Article 5 (Developed) countries.
- All EU countries are required to phaseout consumption by 2005.
- In the table above, Total is the sum of the available country data; Total EU Reported is the consumption data for EU countries collectively as reported by Oberthür 2001. The graph to the left displays the Total EU Reported data.
- Consumption data for Belgium, Italy, and Portugal between 1995 and 1999 are based on U.S. export of methyl bromide to those countries.
- Future designated allowable consumption by country is not presented because those allowances are allocated by the European Community (i.e., the European Community regulate individual countries' consumption as per Regulation (EC) No. 2037/2000 of the European Parliament and of the Council of 29 June 2000 on substances that deplete the ozone layer).
